

Smithtown Christian School
7th Grade Supply List & Directions
2024-2025

One of the greatest challenges students face in middle school years is how to manage increased responsibility. Students go from having one teacher all day long to various teachers throughout the day, each with different expectations. To help make this transition smoother, Smithtown Christian Middle School will use a Master Binder system for the 2024-2025 school year. Students will be taught how to use this organizational system throughout the school year. We ask that you please provide the following items listed below.
